State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

Oroville Dam Auxiliary Spillway Incident

- DWR is monitoring the status of the dam, spillways, and related structures to ensure their continued safety and stability.
- Flow to the Feather River has been reduced gradually to minimize risk to downstream levees per the Army Corps of Engineers operational requirements.
- This flow reduction in the river will be buffered by the Hyatt Powerplant, Diversion Pool, Thermalito Forebay, and the Thermalito Afterbay.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 04/05/17 at 0600 hours](#):

- Inflow: [15,673](#) cfs.
- Outflow: [10,128](#) cfs.
- The current lake elevation is [843.89](#) feet.

Mission Tasking

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-SOC-34379: Caltrans engineer to visually inspect and conduct Impact-Echo Testing on the gated concrete spillway floor – On Scene
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – Coordinating.
- 2017-SOC-31712: 2 Structural Engineers for evaluation of the Oroville Spillway Bridge (Butte County) – On Scene.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- With the bridge removed, the community of Big Sur is isolated, an estimated 450 people, in 3 different areas/enclaves.
- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- The southern detour route is open to local traffic only as of 03/13/17.

Cal OES Inland Region

River Forecast – The following river is forecast to meet or exceed Flood Stage:

- Plumas County: Middle Fork Feather River at Portola is forecast to crest above flood stage at 9.1 feet the morning of 04/09/17
 - Minor flooding of lowlands, rural roads, agricultural areas and some low structures between Beckwourth and Sloat, including Portola.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Colusa County: Sacramento River at Colusa Weir
- Sutter County: Sacramento River at Tisdale Weir
- Sacramento County: Cosumnes River at Michigan Bar, Cosumnes River at McConnell, Mokelumne River at Benson's Ferry
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto, San Joaquin River at Newman
- Merced County: Merced River at Stevinson

Remote/Community Isolations: (Final)

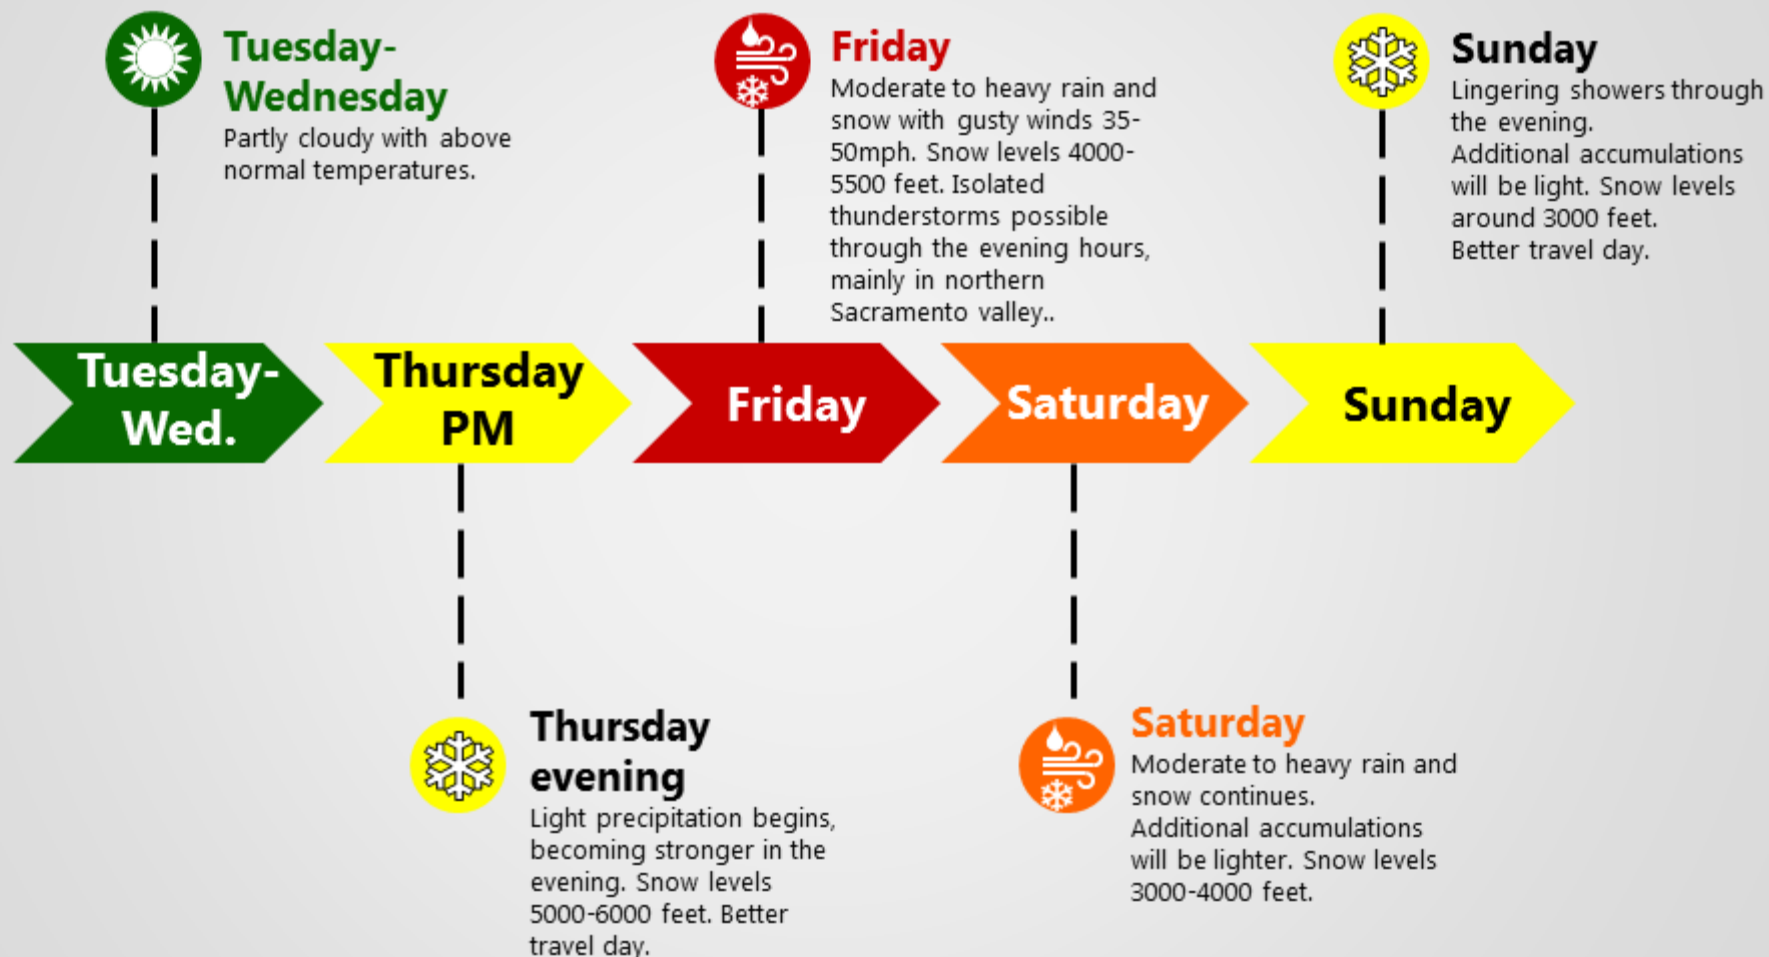

On 04/04/17 at 1338 hours, the Cal OES 9-1-1 Branch reported that Lassen County was experiencing a community isolation affecting Lassen County Sheriff's Office, CHP Susanville, and CAL FIRE Susanville

- All lines have been successfully rerouted to alternate locations
- At 1446 hours, Modoc County Sheriff's Office was included in the isolation. All emergency lines have been rerouted to commercial lines
- As of 1658 hours, a fiber cut was identified caused by squirrels.
- Estimated time of repair is 2000 hours.
- At 2212 hours, the 9-1-1 outage that was affecting Lassen and Modoc Counties has been resolved. The fiber cut has been repaired, all reroutes have been removed, and all calls are being delivered and processed normally at this time.

WEATHER OF CONCERN

Weather of Concern

- An approaching storm will bring increasing strong and gusty winds to portions of Northern and Central California today.
- A series of storm systems will impact Northern California beginning Thursday night, and again Friday through Saturday which will yield locally heavy rain and gusty winds, isolated thunderstorms, small hail, and high elevation snow.

Active Weather Warnings, Watches and Advisories by County:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

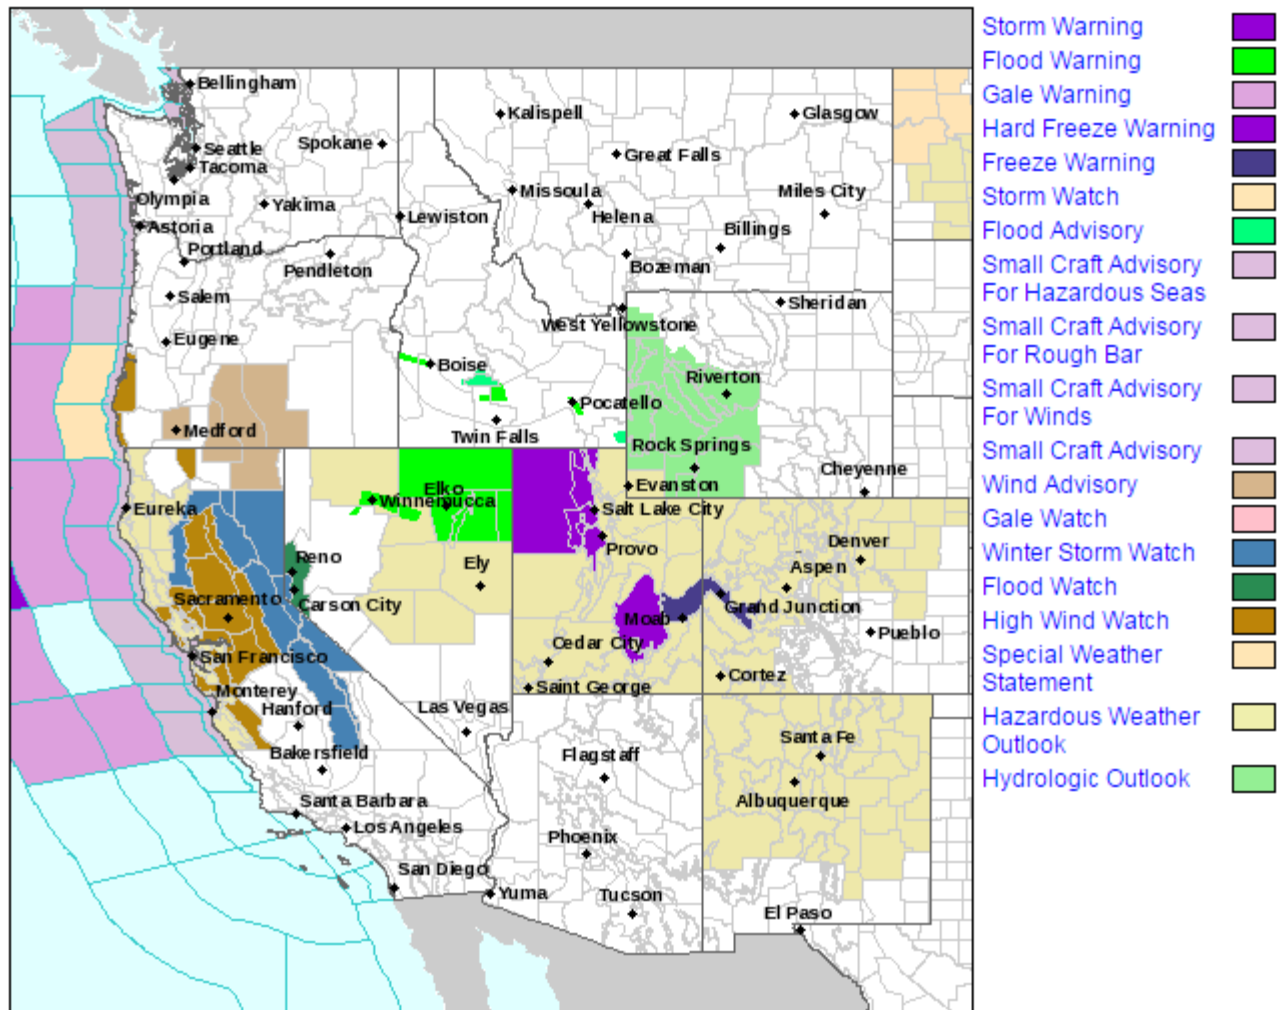

NORTHERN CALIFORNIA

A high pressure ridge over Northern California will produce mild and dry weather through this afternoon. However, the next Pacific storm is parked offshore and mid and high clouds from it will continue to pass over the region for the next couple of days, until it moves onshore tonight and Thursday. Light rain will move into far northwest California tonight. Light to moderate precipitation will spread to the rest of the region on Thursday as the first wave of the storm system moves in. Snow levels will be 5000 ft or higher. More waves of precipitation will move through Thursday night through Saturday, and Sunday night through early Tuesday, with snow levels generally 3000 ft in the north and 5000 ft in the south. The final showers will end in eastern and northern areas Tuesday next week. Another round of wet weather may reach the region later in the week.

SOUTHERN CALIFORNIA

A ridge of high pressure over California will bring significant warming and low humidity to most of the region through today. Maximum temperatures will be in the upper 50s and 60s across the mountains and 70s to low 80s in the valleys today, with mid 60s to mid 70s across the mountains and upper 70s and 80s in the valleys today. Minimum humidity will be mainly between 12% and 25% away from the San Joaquin Valley and coastal areas through today. The ridge will move east and become centered over the Desert Southwest bringing a little cooling to the region Thursday. Winds will be light through Thursday. A Pacific trough will bring much cooler temperatures Friday and Saturday. This trough will also bring showers to Central California Friday morning through Saturday afternoon and to Southern California Friday night through Saturday afternoon. Most of Central California will receive between 1 and 4 inches of rainfall, while most of Southern California receives less than a half inch of rainfall. The snow level will start between 7,000 and 8,000 feet and then drop to between 5,000 and 6,000 feet by Saturday morning. South to west winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Thursday evening through Saturday evening. A weak ridge of high pressure will bring a slow warming and drying trend Sunday through early next week.
